Subject: Axle Ratio Availability with Mustang "Bose 302"
and Cougar "Eliminator 302"

I have checked with both Ford & L-M Car Sales Distribution* and they have a temporary "hold" on the 4.30:1 axle option for the subject vehicles.

Dealers have been informed of this action and are not taking orders for the 4.30:1 axle. If one should be received, I have been assured by Distribution that it would be rejected.
